RIJKSUNIVERSITEIT GRONINGEN

Optimal Blockade of the Renin Angiotensin System in Cardiorenal Dysfunction

Proefschrift

ter verkrijging van het doctoraat in de Medische Wetenschappen
aan de Rijksuniversiteit van Groningen
op gezag van
de Rector Magnificus, Dr. F. Zwarts

In het openbaar te verdedigen
op 27 september 2006
om 16.15 uur

Door

Rudy Martinus Adrianus van de Wal

Geboren op 28 januari 1972,
te Eindhoven

Promotores

Prof. Dr. W.H. van Gilst, department of clinical pharmacology
University Medical Center Groningen, The Netherlands

Prof. Dr. D.J. van Veldhuisen, department of cardiology
University Medical Center Groningen, The Netherlands

Co-promotores

Dr. A.A. Voors, department of cardiology
University Medical Center Groningen, The Netherlands

Dr. H.W.M. Plokker, department of cardiology
St. Antonius Hospital, Nieuwegein, The Netherlands

Beoordelingscommissie:

Prof. Dr. G. Navis, department of nephrology
University Medical Center Groningen, The Netherlands

Prof. Dr. P.A.B.M. Smits, department of pharmacology & toxicology
Radboud University Nijmegen Medical Center, Nijmegen, The Netherlands

Prof. Dr. N.M. van Hemel, department of cardiology
St. Antonius Hospital, The Netherlands

Financial support by the Netherlands Heart Foundation and Jacques H. de Jong Stichting for the publication of this thesis is gratefully acknowledged.

Publication of this thesis was financially supported by:
J.E. Jurriaanse Stichting, St. Antonius Ziekenhuis and Rijksuniversiteit Groningen

Further financial support was provided by:
Astellas Pharma BV, Astrazeneca BV, Boehringer Ingelheim BV, Bristol-Myers Squibb BV, Guidant Nederland BV, Menarini Farma Nederland BV, Merck Sharp & Dohme BV, Novartis Pharma BV, Pfizer BV, Sankyo Pharma Nederland BV, Sanofi-Aventis Netherlands BV, Schering-Plough BV, Servier Nederland Farma BV, Solvay Pharma BV

Tables of contents

Chapter 1 9

General introduction
Outline of thesis

Chapter 2 39

Mild preoperative renal dysfunction as a predictor of long-term clinical outcome after coronary bypass surgery.
J Thorac Cardiovasc Surg. 2005 Feb;129(2):330-5

Chapter 3 51

High prevalence of microalbuminuria in chronic heart failure patients.
J Card Fail. 2005;11(2):602-6

Chapter 4 61

Determinants of elevated angiotensin II levels in severe chronic heart failure patients despite ACE inhibition.
Int J Cardiol. 2006 Jan;106(3):367-72

Chapter 5 75

The influence of the angiotensin II type 2 receptor on vascular tonus of human internal mammary arteries.
Submitted

Chapter 6 **93**

Addition of an angiotensin receptor blocker to full-dose
ACE-inhibition: controversial or common sense?
Eur Heart J. 2005;26(22):2361-7

Chapter 7 **109**

Predictors of ACE inhibitor-induced reduction of urinary
Albumin excretion
Hypertension (accepted for publication)

Chapter 8 **125**

General discussion and conclusions

Chapter 9 **135**

Summary

Samenvatting
