

Bibliography

De Boer D, Tan LP, Gorter P, van de Wal RMA, Kettenes-van den Bosch JJ, de Bruijn EA, Maes R

Gaschromatographic/mass spectrometric assay for profiling the enantiomers of 3,4-methylenedioxyamphetamine and its chiral metabolites using positive chemical ionization ion trap mass spectrometry. *J. Mass Spectrom.* 1997 nov; 32(11):1236-46

Van de Wal RMA, Voors AA, Plokker HWM, van Gilst WH, van Veldhuisen DJ
New pharmacological strategies in chronic heart failure. *Cardiovasc.Drugs Ther.* 2004 Nov;18(6):491-501

Van de Wal RMA, Van Brussel BL, Voors AA, Smilde TDJ, Kelder JC, Van Swieten HA, Van Gilst WH, Van Veldhuisen DJ, Plokker HWT
Mild preoperative renal dysfunction as a predictor of long-term clinical outcome after venous coronary bypass surgery. *J.Thorac.Cardiovasc.Surg.* 2005 Feb;129(2):330-5

Van de Wal RMA, Asselbergs FW, Plokker HWT, Smilde TDJ, Lok DJA, Van Veldhuisen DJ, Van Gilst WH, Voors AA
High prevalence of microalbuminuria in chronic heart failure patients. *J.Card. Fail.* 2005;11(2):602-6

Van der Meer P, Lipsic E, Westenbrink BD, Van de Wal RMA, Schoemaker RG, Vellenga E, Van Veldhuisen DJ, Voors AA, Van Gilst WH
Levels of hematopoiesis inhibitor Ac-SDKP partially explain the occurrence of anemia in heart failure. *Circulation* 2005;112(12):1743-7

Van de Wal RMA, Van Veldhuisen D.J., Van Gilst W.H., Voors A.A.
Addition of an angiotensin receptor blocker to full-dose ACE inhibition: Controversial or common sense? *Eur.Heart J.* 2005;26(22):2361-7

Van de Wal RMA, Plokker HWM, Lok DJA, Boomsma F, Van der Horst FAL, Van Veldhuisen DJ, Van Gilst WH, Voors AA
Determinants of increased angiotensin II levels in severe chronic heart failure patients despite ACE inhibition. *Int.J.Cardiol.* 2006 Jan;106(3):367-72

Van de Wal RMA, Van der Harst P, Wagenaar LJ, Wassmann S, Morshuis WJ, Nickenig G, Buikema H, Plokker HWM, Van Veldhuisen DJ, Van Gilst WH, Voors AA
Angiotensin II type 2 receptor vasoactivity in internal mammary arteries of patients with coronary artery disease. Submitted

Van de Wal RMA, Gansevoort RT, Van der Harst P, Boomsma F, Plokker HWM, Van Veldhuisen DJ, De Jong PE, Van Gilst WH, Voors AA
Predictors of ACE inhibitor-induced reduction of urinary albumin excretion in non-diabetic subjects. Hypertension (accepted for publication)

Van de Wal RMA, Voors AA, Gansevoort RT
Urinary albumin excretion and the renin angiotensin system in cardiovascular risk management. Submitted

*Here's to beefsteak when you're hungry,
Whiskey when you're dry,
To all the girls you ever wanted,
And heaven when you die.*

Cheers!
