

**Psychomotor speed
as a marker for
overtraining in athletes**
A multidisciplinary approach

Esther Nederhof

The studies described in this thesis have been conducted at the Center for Human Movement Sciences and the Center for Sports, Exercise and Health. Both centers are part of the University Medical Center Groningen, University of Groningen, the Netherlands. The work was supported with a grant from the Dutch Ministry of Health Welfare and Sports.

The printing of this thesis was supported by the graduate school for Behavioral and Cognitive Neurosciences, the Medical Faculty and the University of Groningen.
