

*I will praise thee; for I am fearfully and wonderfully made:
marvellous are thy works; and that my soul knoweth right well*

Psalms 139:14
(King James Version)

Martin Hendrik de Borst
geboren op 23 maart 1980
te Deventer

Promotor: prof.dr. G.J. Navis

Copromotor: dr. H. van Goor

Beoordelingscommissie: prof. dr. J.W. Cohen Tervaert
prof. dr. K. Poelstra
prof. dr. W. Timens

Paranimfen: Drs. I. Hamming
T.R. de Jong

The research presented in this thesis was supported by grants from graduate school GUIDE (Groningen University Institute for Drug Exploration) and the Jan Kornelis de Cock Foundation.

Printing of this thesis was financially supported by the Dutch Kidney Foundation, University of Groningen (Rijksuniversiteit Groningen), Faculty of Medical Sciences, and GUIDE. Further financial support was kindly provided by Genzyme Europe BV, Fresenius Medical Care Nederland BV, Baxter BV,

Contents

Chapter 1	General introduction & Aims of the thesis <i>Partly published in Histopathology 2002;41 (Suppl 2):314-319</i>	9
Part I: Protein kinase activation in renal disease		
Chapter 2	Mitogen activated protein kinase signaling in the kidney: target for intervention? <i>Signal Transduction 2006;6:32-53</i>	19
Chapter 3	Profiling of the renal kinome identifies protein kinase pathways involved in angiotensin II-dependent hypertensive renal damage <i>Provisionally accepted Am J Physiol Renal Physiol 2006</i>	59
Part II: Mitogen-activated protein kinase inhibition in renal disease		
Chapter 4	Specific MAP-kinase blockade protects against renal damage in homozygous TGR(mRen2) ²⁷ rats <i>Lab Invest 2003;83(12):1761-70</i>	79
Chapter 5	Induction of Kidney injury molecule-1 (Kim-1) in homozygous Ren2 rats is attenuated by blockade of the renin-angiotensin system or p38 MAP kinase <i>Am J Physiol Renal Physiol 2006 In press</i>	97

Chapter 6	c-Jun N-terminal kinase inhibition reduces renal interstitial macrophage accumulation through inhibition of monocyte chemoattractant protein-1 <i>Submitted</i>	119
Chapter 7	Glomerular and tubular induction of the transcription factor c-Jun in human renal disease <i>Submitted</i>	145
Chapter 8	Summary, General discussion and Future directions	167
	Nederlandse samenvatting	175
	Color figures	181
	Curriculum vitae	193
	List of publications	194
	Dankwoord	196
